

# SWM8 WITH E2 SWM Expander

[www.swm8.com](http://www.swm8.com)

Connect your SWM-compatible receivers to the SWM1 and/or SWM2 ports of each of the two SWMs. See the other wiring diagrams at [www.swm8.com](http://www.swm8.com) for instructions on how to connect receivers to the SWMs. Since your SWMs already have power through the E2, you will not be using the gray SWM power supply shown in our other wiring diagrams.
